

используйте ресурсы эффективно

В Contented ваши сотрудники получают навыки, без которых в современной бизнес-среде не обойтись

не учим

- Опирайтесь лишь на свои вкусы и опыт
- Упускать из вида данные и CJM
- Использовать морально устаревшие технологии
- Слепо копировать у конкурентов

учим

- Проводить тесты в поисках лучшего решения
- Делать не только «красиво», но и эффективно
- Генерировать оригинальные идеи
- Постоянно пополнять базу знаний и осваивать новые инструменты

Преимущества перед другими курсами

Стандартный курс

- 01 Много мотивирующих слов, но непонятно, что конкретно делать прямо сейчас
- 02 Постоянные отсылки на лидеров отрасли, успешных людей и призыв делать, как они
- 03 Рефлексия о том, как работает рынок, кому нужна твоя фотография и кто ты в этом мире
- 04 Еще немного мотивации и продажа дополнительного курса

Курс «Вакцина от бедности 3.0»

- 01 Конкретные поэтапные шаги, которые нужно просто сделать и увидеть результат
- 02 Общение и поддержка эксперта, который не рассказывает про успешный успех, а показывает опыт и работающие кейсы
- 03 Готовый рецепт без анализа рынка, самокопания и дополнительных покупок: какая фотография продается и как ее делать, кто ее покупает, как ее продать, как общаться с клиентами и т.д.
- 04 Практичные бонусы, которые пригодятся в работе
- 05 Нет ограничения по опыту и знаниям — подходит для всех, кто занимается фотографией

/ THE HONEST TRADE-OFF

In-house hire, freelancer, or Wavespace?

Pick Wavespace if you want an embedded design and dev team that designs research-first and ships investor-ready live in days, not next quarter.

Wavespace

✓ **Senior from day one**

The people who pitch you are the people who build you. No junior swap after you sign.

✓ **We ship the build ourselves**

We design code-ready and write the front-end. Nothing dies between Figma and production.

✓ **We stay and optimize**

We design for activation and conversion, run CRO and A/B tests, and stay long after launch.

✓ **One fixed number**

Scoped up front before we start. No change orders, no surprise line items.

✓ **A live product, in production**

You walk away with something real users can use, shipped, running, and converting. Not a folder to hand to someone else.

Traditional agency

✗ **Pitch team, then a handoff**

Senior partners win the deal, a junior team does the work. You get Figma files, a handoff doc, and goodbye.

✗ **Handoff, then hope**

A pixel-perfect Figma file your devs have to reverse-engineer, and half the polish quietly dies in the build.

✗ **Invoice closes, team leaves**

The invoice clears, and the team moves on. Whether the funnel actually moves is your problem.

✗ **Low quote, then add-ons**

A low number wins the deal, then the extras land. The final invoice rarely matches the proposal.

✗ **A folder of deliverables**

You walk away with Figma files, a deck, and a handoff doc. Turning any of it into a working product is on you.

The Evoke® Way

- ✓ Data-driven creative briefs
- ✓ Senior experts & specialized creators
- ✓ Performance-led, agile partnerships
- ✓ Relentless daily creative testing
- ✓ High Production Creatives & UGC

The Old Way

- ✗ Creative disconnected from data
- ✗ Bloated overhead & junior staff
- ✗ Rigid, long-term contracts
- ✗ 'Set it and forget it' campaigns
- ✗ 'Stock photos & hope'

[+ / 006 / | The difference](#)

Two ways this goes. We have seen both.

Five things that go wrong with automation projects, and what we do instead. Most of them cost less to avoid than to fix.

[Work with us](#)

WITHOUT GENESY

- × A pilot that never leaves the demo
- × A tool your team quietly works around
- × Scope that grows every sprint
- × Output nobody can check
- × A system only the agency can change

• WITH GENESY

- ✓ In production inside 21 days
- ✓ Built inside the tools you already run
- ✓ Fixed scope, agreed before we build
- ✓ Every step a human can audit
- ✓ Documented so your team owns it

② WHY US

Here's why we stand apart from the rest

Problem with other

- ⊗ **Generic automation**
Templates that lack personalization and creativity
- ⊗ **Complicated dashboards**
Overloaded with features you'll never use
- ⊗ **High costs, low returns**
Expensive subscriptions with hidden fees
- ⊗ **Slow, manual processes**
Switching between tools wastes time and slow process
- ⊗ **Limited insights**
Basic analytics that only show numbers

What sets Gilan apart

- ✓ **AI-Powered campaigns**
From ads to emails, create content that resonates.
- ✓ **One-click automation**
Manage multiple channels without the manual work.
- ✓ **Smarter analytics**
Real-time insights that go beyond vanity metrics.
- ✓ **Personalization at scale**
Deliver the right message to the right audience
- ✓ **Cost-efficient growth**
Optimize budgets with AI-driven precision.

[The Difference](#)

OTHER AGENCIES

They take the brief, build something standard, and move on. Most solutions are recycled from the last client. You're paying for effort, not outcomes.

Generic solutions built for everyone

Months of back and forth

Deliverables handed off, then they're gone

One-off projects that don't compound

WORKING WITH AUTR

We learn how your business actually operates before we touch anything. What we build is specific to you, measured by results, and designed to compound over time.

Systems designed around how your business actually runs

Live within three weeks, built on your existing stack

We measure success by time saved, not tasks completed

Every build creates a foundation for the next layer of growth

THE PROBLEM

Manual work is quietly killing your momentum

Scattered tools, copy-paste busywork, and dropped handoffs. Here is what changes the day you switch.

Without FlowPilot

- × Hours lost copying data between disconnected apps
- × Handoffs slip through the cracks with no clear owner
- × No visibility into what is stuck or why
- × Your best people stuck doing repetitive busywork

With FlowPilot

- ✓ Data flows automatically between every tool
- ✓ Every handoff has a clear owner and deadline
- ✓ Real-time dashboards show exactly what is happening
- ✓ Your team focuses on work that actually matters

COMPARISON

A different approach to digital design

Other Agencies

- Visual-first, less structured execution
- Template-based or reused solutions
- One-off design without long-term system
- Inconsistent or flexible workflows
- Limited communication and involvement
- Surface-level design decisions
- Focused mainly on aesthetics

OFFSET354

- * Structured, system-first approach
- * Custom design for every project
- * Focus on scalable design systems
- * Clear process with defined stages
- * Close collaboration with clients
- * Detail-driven execution
- * Built for performance and growth

Why choose us

Why leading teams always choose Adverix

Other Agencies

Collaborate seamlessly with diverse teams
to achieve innovative and impactful results.

Weak execution Generic strategies Limited insights
Reactive planning Weak research
Siloed teams Short-term focus Inconsistent results
Low transparency Fixed processes
Surface analysis Delayed decisions Minimal scalability

With Adverix

Partner with Adverix for strategic solutions
that drive measurable business growth.

Clear strategy Deep insights Fast execution
Data driven Strong alignment Proactive planning
Measurable results Integrated teams
Cost efficient Full transparency
Scalable solutions Strategic clarity

COMPARISON

Why this coaching?

Without CoachVerse

- ✗ Wasting time on trial and error.
- ✗ No structured growth plan.
- ✗ Struggling alone with no direction.
- ✗ Slow, inconsistent client flow.
- ✗ Unclear positioning in your niche
- ✗ Offers that fail to convert

With CoachVerse

- ✓ Proven client acquisition strategies.
- ✓ Clear roadmap for scaling your agency.
- ✓ Personalized guidance & support.
- ✓ Faster results & higher profitability.
- ✓ Learn from real agency success stories.
- ✓ A repeatable client acquisition system

Discord vs Cushion

Compare Discord and Cushion to see why modern teams choose a privacy-first Discord alternative for structured, async communication.

Cushion

- ✓ Purpose-built Discord alternative for teams
- ✓ Threaded, topic-first discussions
- ✓ Structured async communication
- ✓ Clear decision history and summaries
- ✓ Built for product and project teams
- ✓ Never asks for biometric data

[Try Cushion](#)

Discord

- ✗ Great for real-time chat and voice
- ✗ Context can disappear in busy channels
- ✗ Basic thread organization for project work
- ✗ Limited business-tool integrations
- ✗ Gaming-first brand perception
- ✗ Biometric checks can be required in some flows

OUR APPROACH

Structural Differences

How our operating model diverges from the standard agency structure.

	Other Agencies	Trafflane Model
INCENTIVE	✗ Maximize ad spend & retainers.	✓ Maximize profit contribution.
STRUCTURE	✗ Account managers & generalists.	✓ Systems engineers & specialists.
DECISION LOGIC	✗ Reactive to client emotion.	✓ Predictive based on unit economics.
OUTCOME	✗ Volatile performance spikes.	✓ Compounding stability.

Больше контекста — выше качество диалога и конверсия звонка

Логика

Понимание речи

Знания

Конверсия звонков

Контроль

Классический робот

Когда точность важнее креатива

- ◆ Нужно учесть все возможные ответвления в разговоре с клиентом, чтобы добиться цели звонка
- ◆ Распознаёт только ключевые слова и реагирует на нажатие цифр
- ◆ Не обладает контекстом задачи, озвучивает только фразы, которые вы заранее записали
- ◆ Зависит от качества сценария и попадания оффера в аудиторию
- ◆ Говорит только то, что вы пропишете в сценарии — ни слова больше

Голосовой робот с + ИИ

Когда важен живой диалог с клиентом

- ◆ Робот сам определяет, как вести разговор к цели. Всё, что нужно, он берёт из контекста и базы знаний
- ◆ Понимает свободные ответы, уточняет параметры
- ◆ Опирается на базу знаний о компании и продукте, учитывает контекст, который вы задали для звонков
- ◆ Робот заменяет человека — конверсия зависит от формулировки задачи и наполнения базы знаний
- ◆ Ограничен только характеристиками персонажа, базой знаний и задачами

From chaos to clarity

Beautiful design, but users get lost and can't find key features

✧ **SOLUTION:**

We create logical and intuitive mobile designs that help users achieve their goals effortlessly.

Low conversions due to a confusing interface

✧ **SOLUTION:**

We analyze behavior, test interactions, and optimize conversions for seamless user flow.

Disorganized design, disjointed UI, no visual consistency

✧ **SOLUTION:**

We create structured design systems that ensure flexibility and maintain a unified look and feel.

Users don't understand how the product works

✧ **SOLUTION:**

We craft clear, intuitive interfaces that require no extra guidance.

We solve business challenges through mobile design

We know choosing the right agency is hard because few **truly deliver**.

So we made it simple **to compare** how we work  versus what you usually get **in the market**.

Other agencies

- › Slow, unclear timelines
- › Extra charges for changes
- › No clear process
- › Designs break in dev
- › Complex, hard builds

Agnos agency

- › Clear weekly updates
- › Transparent pricing
- › Documented workflow
- › Design–dev alignment
- › Clean, scalable builds

• WHY CHOOSE US

Education That Delivers Results

Lumivest		Other Courses	
✓	Deep Understanding	×	Surface Knowledge
✓	Proven Frameworks	×	Random Advice
✓	Long-Term Vision	×	Short-Term Thinking
✓	Data-Driven Decisions	×	Emotional Decisions
✓	Strategic Investing	×	Reactive Investing
✓	Informed Opportunities	×	Missed Opportunities

UNMADE VS THE ALTERNATIVES	
What makes Unmade better?	
The alternatives	Unmade
Visualise only	✔ Visualise & manufacture
Dedicated production and teams for custom orders	✔ Use existing systems, infrastructure and team workflows
Complicated manual process	✔ Agile automated workflow
Expensive limited runs	✔ Cost-effective small batches – fully scalable from 1 - 10000+
Heavy upfront investment, with no additional innovation	✔ Subscription software as service with updates included
Configurators leave you and production to pick up the pieces	✔ Automate every stage of production to manufacture
Manual process and staff heavy	✔ Completely customer self service
Custom in store or ecommerce channel only	✔ Custom production accessible to any channel

Reconstruction → Continuous record

MANUAL OVERSIGHT

- ✗ Findings buried in multi-page reports
- ✗ Patterns missed across sites
- ✗ Decisions tracked in spreadsheets and email
- ✗ Audit trail reconstructed under pressure

WITH PANOPTIVE

- ✓ Findings surfaced across reports and data
- ✓ Cross-site patterns identified early
- ✓ Structured decisions with evidence and rationale
- ✓ Continuous, audit-ready oversight record

WHY ALPHAOS

AI coding shouldn't cost this much

THE OLD WAY → THE ALPHAOS WAY

Paying full price for every token ❌ → ✅ 10× cheaper token usage

Switching between multiple AI tools ❌ → ✅ Every LLM in one single app

Losing context between conversations ❌ → ✅ Persistent context across all models

Paying full price for every token ❌ → ✅ Auto-routing to the smartest model

One workspace, every AI model, and a fraction of the cost — all inside your favorite code editor.

THE REALITY

Guests don't wait. *They just leave.*

2:47 AM · Guest calls about the spa

WITHOUT RIVIERA

Voicemail. No message left. They book at the hotel down the street.

WITH RIVIERA

Answered on the first ring. Spa hours confirmed. Guest books before breakfast.

FRIDAY, 3 PM · Check-in rush, phone ringing

WITHOUT RIVIERA

Front desk can't pick up. Caller hangs up after four rings.

WITH RIVIERA

Call handled in parallel. Front desk stays focused on the lobby.

6:12 AM · Guest texts for late check-out

WITHOUT RIVIERA

Message unread until 11 AM. Housekeeping confused. Guest annoyed.

WITH RIVIERA

Request read, availability checked, 1 PM departure confirmed and logged. All before staff wakes up.

SATURDAY NIGHT · Fully booked, two calls at once

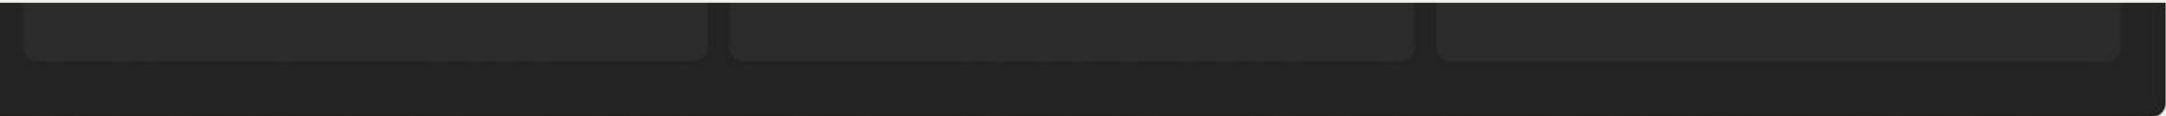

WITHOUT RIVIERA

One caller goes to hold, hangs up, leaves a one-star review.

WITH RIVIERA

Both calls answered simultaneously. No hold music. No angry review.

Continuous between-session support for better access, stronger engagement, and sustainable margins

Here's how Sage supports behavioral health care delivery

Contact Jimini →

Features	With Jimini	Without Jimini
Patients receive continuous behavioral health support , while clinicians always remain in control	✓	⊗
An engaging and modern patient experience, on brand with your practice	✓	⊗
Improved margins and reimbursement opportunities	✓	⊗
Measurement-based care seamlessly integrated into the patient and clinician experience	✓	⊗
Reduces administrative burden and supports audit-readiness	✓	⊗

THE DIFFERENCE

Why People Choose US?

	OTHERS	 BLOOME
Dedicated clinician for every visit		
Unbiased ingredient analysis		
Personalized routine based on skin scan		
Real-time progress tracking		

• Performance shift

From manual marketing to *AI-powered growth*

Campaign launch

✕ 2-3 weeks

✓ 1-2 days

Content production

✕ 3-5 days per asset

✓ Minutes

Lead qualification

✕ Several hours daily

✓ Instant

Campaign optimization

✕ 1-2 weeks per iteration

✓ Real-time

Enterprise-level safety **on your terms.**

Guardrails on every action, in your environment and controls.

GENERIC AGENT

- × Weak data permissions
- × No cost visibility
- × Fragile data plumbing
- × Runs destructive changes freely
- × No audit trail

ALKERA

- ✓ SQL-aware permissions
- ✓ Cost estimates and ledger
- ✓ Native, schema-aware connectors
- ✓ Destructive work waits for approval
- ✓ Full audit log of every action

What teams stop guessing about.

Before Ergo	Before Ergo	With Ergo
Close-lost analysis	Rep picks the closest option from a dropdown	Actual themes derived from what prospects said
Product roadmap input	What one PM heard on a call last week	Aggregated feature requests across every customer conversation
Churn risk	Product analytics, gut feel, and late signals	Voice-of-customer signals surfaced before it's too late
Competitive Intelligence	Reps manually mark competitors that are involved	Concrete data on how often each competitor comes up, when they come up, and what your prospects prefer about your competitors over your solution
Objection strategy	What the best rep thinks works	What the data shows actually works, across the whole team

COMPARE AGENCIES

Us vs the rest

Most AI agencies sell you a plan. We hand you working software.

Traditional agencies

Forja

12-week discovery phase
Months before anything ships.

Working software in 8 weeks
Kickoff to production, fixed.

Hourly billing, scope creep
The invoice keeps growing.

Fixed price, fixed scope
One quote. One invoice.

A Notion doc and a deck
You own slides, not software.

Systems that run in production
Live software, not slideware.

Buzzwords and frameworks
Big talk, nothing in production.

Code your team owns
Your repo. Your infrastructure.

Disappear after launch
Support ends at the invoice.

Stay for training and support
30 days priority response.

The old vs. the intelligent way

See how traditional workflows compare to a unified AI operating system built for modern teams.

	Old way	NeuralOS
Workflow Management	✗ Manual processes across disconnected tools.	✓ Automated workflows powered by intelligent agents.
Knowledge Access	✗ Scattered docs buried in drives and chat threads.	✓ Centralized knowledge with AI-powered memory.
Task Execution	✗ Repetitive tasks handled manually by team mates.	✓ Autonomous execution handled by AI in real time.
Decision Making	✗ Slow decisions based on fragmented data & reports.	✓ Real-time insights driven by connected data.
Collaboration	✗ Constant meetings and endless message chains.	✓ Context-aware collaboration with auto updates.
System Integration	✗ Manually syncing tools with fragile integrations.	✓ Integrations orchestrated from one platform.

GutGutGoose vs. generic probiotics

Every probiotic asks you to trust the label. So does ours. Right up until we re-sequence your gut and show you which strains colonized.

	GutGutGoose	Generic Probiotic
Formulation	✓ Built from your sequencing	✗ Same blend for everyone
Colonization	✓ Strains colonize your open niches	✗ Strains pass through
Ingredients	✓ Only the strains you need	✗ Strains you don't need + fillers
Duration	✓ Still there a week after you stop	✗ Gone within 48 hours
Dosage	✓ Every strain dosed for you	✗ One fixed dose for everyone
Verification	✓ We score what colonized	✗ Nobody checks
